# digitime

Do you have field based staff who need to record their work time and manage it while on the go? DigiTime solves this problem and more by enabling staff to clock-in and clock-out from any location directly from their smart phones.

DigiTime can also be accessed from desktop or laptop computers through an easy-to-use web portal, enabling office based supervisors and payroll staff to verify, approve and process timesheets. Smart approval workflows and notifications ensure the accuracy and timeliness of reporting so that your staff are paid on time.

**Manage your time even when you are away from the office**
Clock in and clock out from any location with our user friendly mobile app

**Stay on track with smart alerts**
Customisable notifications ensure your staff don't forget to clock-in or out. Alerts keep staff informed about timesheet submissions and approvals.

**Assign time to jobs, clients or sites**
Intelligently track your company's time across projects by assigning staff activity against different jobs, clients or sites.

**See a summary of your work week**
DigiTime's dashboard view provides a helpful summary of work time for the week so your staff can track their progress.

**Record breaks, leave and more**
Capture break times, leave and banked hours.
