

DigiOrder Sales

In today's fast-paced business environment, sales teams are often on the go, meeting clients, attending events, or visiting multiple locations. DigiOrder enables your sales team to create sales orders while "out and about". This is essential for maintaining productivity and responsiveness. With DigiOrder, sales reps can instantly capture orders and access real-time product information from anywhere - no need to be tied to a desk or office. This ensures faster turnaround times, more accurate sales order processing, and an overall smoother customer experience, leading to higher sales efficiency and improved client satisfaction. It's a game-changer for businesses looking to stay ahead and streamline their sales process on the move.

Does your mobile sales team find it challenging to take and place orders for their customers? Would you like your sales team to spend more time selling rather than performing administrative tasks? Are there frequent errors on orders, such as incorrect item numbers or prices? DigiOrder for Sales Orders solves these problems. DigiOrder for Sales allows your sales team to quickly and accurately place orders in Business Central from their smartphone or tablet, whether they are online or offline. When online, item, customer details, and sales orders are updated on the app, ensuring the salesperson has all the necessary information to create orders.

Do your sales team a favour and get them the DigiOrder App.

They'll love you for it.

Pricing

Initial setup fee: \$3,750

- Integration with Business Central 365

DigiOrder

Do you have staff who need to place orders for products and services when they are away from their desk? Do you use purchase order books and then have trouble getting the paper copy to the Accounts Payable team who then have to rekey the order into Business Central? DigiOrder solves these problems and more by enabling staff to place orders from their smart phone. No more time wasted looking for lost orders. Also, users can use the DigiOrder App to receipt goods and services when supplied. DigiOrder comes with a web portal enabling Accounts Payable staff to check the status of orders when invoices are received. The purchase orders with any receipt information are sent to Business Central for processing and matching when the invoice arrives.

Features

- Create and send POs on a user friendly mobile app
- Configurable approval process with notifications
- Search and approve POs on a centralised web portal
- Receipting of goods received (full or partial)
- Request quote
- Duplicate an existing order
- Send PO direct to supplier via email
- Integration with Business Central 365
- Fill in the order by line item, or just enter a description with total amount
